### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15 and 17-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leon (US patent 6,701,304, effective filing date 7/22/1998).

Leon shows all of the limitations of the claims except for specifying tax information on the data structure.

Leon shows a method and apparatus for postage label authentication. The invention provides human-readable and machine-readable portion in a postage label (physically associated with a package). The data and symbology readers provide the information to a computer. The computer receives information from the readers and provides a status signal that indicates whether the postage label is authentic. (column 3, lines 5-7) In one embodiment (column 11, lines 10-21), the machine-readable portion is an RFID device (wireless memory tag, machine readable structure) as shown in US patent 5,497,140 (Tuttle, incorporated by reference), which has a memory 86 (data storage) containing owner's name (manufacture), ID number (product type), point of origin (origin identifier), weight, size, route, destination, and the like. (column 6, lines 20-21 of Tuttle). Column 6, lines 36-38 (Leon), indicates that the printers are capable

printing other information such as address label, tax stamp (includes tax information), secured ticket, money order and the like.

Leon is silent to what information would be on the machine-readable portions of the alternative embodiments of the address label, tax stamp, secured ticket, money order and the like. It would be obvious to one of ordinary skill in the art to duplicate the human-readable information on the machine-readable portion in order to provide authentication data.

Based on the discussion above, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Leon tax stamp embodiment to incorporate the tax information from the tax stamp on the machine-readable portion in order to provide tax stamp authentication data.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chan et al. and Teller et al. show systems of interest.
